## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, 8-10, drawn to communicating data in a client-server environment, classified in class 709, subclass 203.
  - II. Claim 7, 11-21, drawn to information processing by character string extraction methods, classified in class 715, subclass 530.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as the ability to provide to a client browser a data file from a server, and for extracting information from the data upon detecting an operating event by a user. Invention II has separate utility such as extracting a character string after detecting a specific operation based on user input. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
